

# Our Clinical Trial Solutions.

## Direct-to-Patient Site

---

Only 8% of the U.S. population currently has access to clinical research. Our solution expands trial access beyond traditional geographic limits by delivering high-quality assessments and trial participation directly to patients' homes. Our approach eliminates the need for patient travel, ensuring that even those in rural or underserved areas can participate in studies.

### Nationwide Reach:

Access 100% of the U.S. population, ensuring faster, more diverse enrollment.

### 50-State Medical Licensure:

Seamless study management nationwide.

### Streamlined Start-Up:

Single 1572 and IRB submission accelerates timelines.

### FDA Inspected:

Validated for quality, reliability, and trustworthiness.

## Patient Recruitment

---

Traditional recruitment models often produce unqualified leads, wasting time and resources. Our solution process guarantees that every referral is pre-screened and meets study criteria, allowing sponsors and sites to focus on ready-to-go patients rather than sorting through unsuitable candidates.

### 100% Medical Record-Qualified Referrals:

Patients pre-screened via medical records to meet study criteria.

### Clinician-Reviewed:

Internal doctors and nurses ensure participants are study-ready.

### Results-Based Pricing:

90%+ results-driven model minimizes sponsor risk.

### Improved Efficiency:

High-quality referrals streamline recruitment and accelerate enrollment.
